Example of usage

The layout of the catalogue is based on collection areas. Cataloguing is chronological, based on issue date in these sections. Special stamp issues, such as postage due stamps are always annexed to the main section. Numerous colour images and a comprehensive index annexed to the catalogue, which lists overprints and stamp inscriptions, help collectors to organize their stamps, taking them quickly to the correct issues. An overview of definitives and personalities on stamps in the annex to the main section makes organization easier.
